Subject: sludge application on G.D. Gilliam Land in Campbell County

Date: Mon, 8 May 2006 18:17:27 -0400

Dear Dr. Nichols.

I am writing at the request of my patient, Ms Georgia Ellington who has a history of adenocarcinoma of the lung treated in the past with surgical resection followed by chemotherapy and more recently by whole brain radiotherapy and most recently with stereotactic radiosurgery. She is currently experiencing headaches and nausea and vomiting.

I realize the economic importance of providing cities such as New York a place to dump their waste. Nevertheless, I am concerned about the inequity in our legal system with respect to selection of sites designated for the dumping. Mr. and Mrs. Ellington are upstanding citizens who have worked hard all there lives. She was diagnosed with right lung cancer and has endured much in the way of surgery and radiation.

I would like to request that the dumping of waste in the vicinity of the Ellington's home be halted or at least delayed by at least one year. I believe that you can empathasize clearly with Mrs. Ellington's situation.

Sincerely,  
Ted Chung,
