Subject: sludge application on G.D. GILLIAM LAND in CAMPBELL county

Date: Mon, 8 May 2006 04:18:09 -0400

TO ALL IT MAY CONCERN

I am writing you about the pending sludge application scheduled for this week May 12 2006 on the Gilliam farm on HICKORY CREEK ROAD in CAMPBELL county, VA. within an approximate 1/2 mile of my residence. My wife Georgia Ellington had lung cancer with most her right lung removed on Dec. 5, 2004. She now has been diagnosed with brain cancer and is on prescribed medication and under medical care. My wife currently suffers from acute sensitivity to odors and experiences nausea. My wife is currently under a physicians care and a letter re exposure to sludge content is being requested from her physician. I have previously advised LHD DIR. KATHERINE V. NICHOLS LYNCHBURG, VA. and released medical records as per her request. To date, no health survey has been conducted prior to permitting the pending sludge application site nor have I been advised by DR. NICHOLS as to any protective measures to be taken against odor or aerosol sludge content exposure. My local county supervisor knows about my wifes sickness and has given no assistance or safety assurance. My county is presently without a local monitor to assist in the monitoring and/or testing of the proposed sludge and application site. I have not been contacted as to specific time, location or given any information re the constituents of the proposed sludge to be applied near my home. We have lived at 1560 HICKORY CREEK ROAD since 1983. We own our house and property. I am disabled and have only one arm and have alot of medical problems. We cannot afford to move. I am asking you to help stop this sludge application,

THANK YOU

DALE ELLINGTON
